

## Sample Paper

### DBA

#### I.Fill in the Blanks 15 X 1=15

- 1.JFC is a set of .....
- 2.The JFrame class is an extension to the .....
- 3.The ..... class extends the JComponent.
- 4.An ODBC has ..... layers.
5. The application layer provides .....
- 6.TCP stands for .....
- 7.The OSI reference model consists.....
- 8.RMI stands for .....
- 9.A remote interface is a .....
- 10.The collection interface is at the root of the.....
- 11.A .....object represent or reflect the class.
- 12.....is a Java version of the component based software development.
- 13.A .....can be defined as a mini server side program.
- 14.A cookie is piece of data, that can be embedded in .....
- 15.A..... consists of requests.

#### Advanced Java-T

#### II.Choose the best answer. 15 X 1=15

- 1.The Icon interface defines.....  
a) methods b) object c) JComponent d) text
- 9.The collection interface is at the root of the.....  
a)collection API b)applet  
c)reflection API d)constructor
- 2.The JToggleButton class provides a .....button.  
a) three state b) two state c) one state d) five state
- 10.Index property to takes .....  
a)array of values b)arrays  
c) properties d)javabeans

- 3.The JDBC drivers are actually managed by the utility class .....  
a) driver manager  
b) connection interface  
c) connection object  
d) JDBC connection
- 11.All jar files need to be placed in.....  
a)directories b)jar directories c)files d)class
12. Java Bean is a ..... software development  
a)object based b)component based  
c)property based d)tools based
4. .... is invented by E.F.Codd.  
a) RDBMS b) TCP c) UDP d) UDP
- 5.The OSI reference model consists of a .....Architecture.  
a) seven layer b) five layer c) four layer d) one layer
- 6.TCP is a ..... data stream device.  
a) connection oriented  
b)connection object  
c) object oriented  
d)connection
7. RMI application is a .....  
a) client side b) server side c) object d) methods
8. RMI architecture has .....  
a)four layer model  
b)two layer model  
c)three layer model  
d)one layer model
13. .... is a mechanism that servlets use to maintain the state.  
a)session tracking b)rmi c)server d)cookie
14. HTTP stands for .....  
a)hyper text protocol  
b)hypertext transfer protocol  
c)text protocol  
d)protocol
